

REVENUE ACCELERATOR MAX PROTECTION (RAMP®)*

RAMP® allows producers the opportunity to boost revenues at specific risk levels within their risk management plans. RAMP® supplements the insured's MPCI coverage and is designed to help provide additional coverage when production and/or revenue losses are just over or under an insured's MPCI guarantee.

How Does It Work?

- **RAMP® Yield**
RAMP® Yield (RY) is a plan that pays based on where the production to count (harvested bushels) falls within or below the selected coverage band.
- **RAMP® Revenue**
RAMP® Revenue (RR) is a plan that pays based on where the harvest revenue falls within or below the selected coverage band.
